

KEN[®]

Hygiene Systems

Food & Pharma

High quality solutions for a consistent washing result and a good hygiene practice

Hygiene Systems

About KEN

Ken is an innovative company established in 1941. Today, KEN offers efficient and environmentally-friendly hygiene solutions based on our technological know-how and a close cooperation with our customers.

By listening to our customers requirements and understanding their needs KEN co-create value-adding hygiene solutions for the food and pharmaceutical industry.

KEN Food & Pharma solutions are engineered and manufactured in Denmark supported by a strong service back-up team. Based on KEN's extensive experience from the healthcare industry, KEN Food & Pharma solutions are designed to comply with our customers' GMP requirements.

Hygiene Systems

Product range

Hopper Cleaner 948

Multi Purpose Washer 25

Multi Purpose Washer 50

HC 948

- Efficient and compact washing solution
- Space-saving design - requires no extra space to open the doors
- Can be installed next to the multi head weigher system
- Process surveillance ensures a high level of hygiene
- Individual program settings for optimized operation

MPW 25

- Eliminates the risk of cross-contamination and ensures the highest hygiene standards
- User-friendly and easy to operate
- Contributes to a good hygiene practice and working environment
- Datamonitored washing process ensures a high and consistent washing result
- Efficient drying system
- Customized racks - even for internal wash of bends and pipes

MPW 50

- Efficient washing solution
- Ideal for industries with a large capacity - 5m³ washing area
- Drying system available to minimize down-time
- User-friendly and easy to operate
- Thermal/ chemical disinfection

- Hygiene safety is our concern

Hygiene Systems

Product range

Container Cleaner 1221

Trolley Washer 1225

Trolley Cleaner 910 R

CC 1221

- Efficient solution for internal and external washing of different types of containers
- Easy loading/unloading and user-friendly operation
- Process documentation of every cycle ensures a high level of hygiene
- Supplied with one door. Can be supplied with two doors (pass-through) for separation of unclean and clean production area
- Thermal disinfection (80°-90°C hot rinse)

TW 1225 / TW1225 XL

- Highly flexibility - compatible with a large range of trolleys
- Approx. 4-5 min. per washing cycle including loading and unloading
- Automatic loading/unloading system is available
- The option of steam heating gives shorter process time and minimizes down-time in production.
- Extended version available

TC 910 R

- Efficient washing solution based on a patented system
- Low consumption of water, energy and detergents
- Capacity of approx. 40-100 service trolleys an hour
- Supplied as a pit-model or with a ramp for easy loading/unloading
- Ideal for railway and airline catering as well as for hospitals and industrial kitchens.

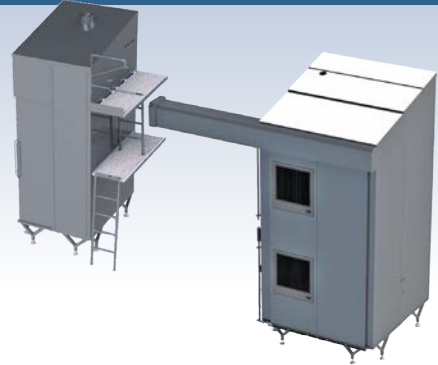

Hygiene Systems

Product range

Cart Washer Disinfector 5000

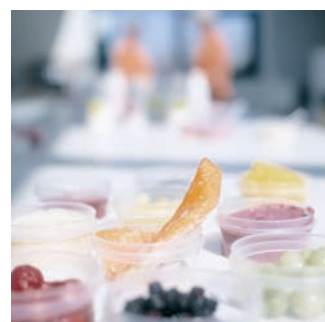

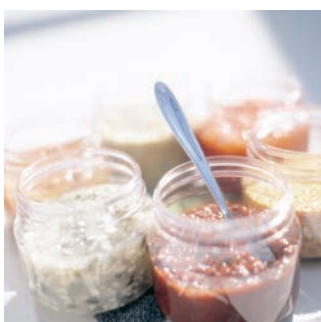

Equipment Washer Disinfector 1000

CWD 5000

- Efficient solution for washing, disinfecting and drying various process equipment
- The CWD 5000 can be supplied as a GMP-solution.
- Supplied with a glass door. Can be supplied with two doors (pass-through) for separation of unclean and clean production area
- Full process documentation and traceability
- Thermal disinfection (80°-90°C hot rinse)
- Individual adjustment of the washing frame to optimize the washing result

EWD 1000

- Customized and highly flexible solution with separate power unit and washing unit
- The EWD 1000 is designed for the pharmaceutical industry and can be supplied as a GMP-solution.
- Full process documentation ensures a high level of hygiene
- Uniform and validated washing processes of high quality
- Thermal disinfection (80°-90°C hot rinse)
- Closed drying system based on condensation
